

Overlocker Stitch Chart

4 THREAD OVERLOCK SAFETY STITCH

The stitch employs both needles and stretches without breaking. Excellent for sewing knits, t-shirts and loose fitting woven garments.

3 THREAD OVERLOCK STANDARD

Popular for garment construction on medium to heavyweight fabric. Generally used as an edge finish on single layers of fabric.

3 THREAD OVERLOCK NARROW

Same pattern as the standard overlock, but with narrower width. Commonly used for garment construction and lingerie with light to medium weight fabrics.

2 THREAD OVERCAST

The needle and lower looper threads form an edge finish that is lightweight and flat. Often used as an open seam edge on lightweight fabrics.

3 THREAD ROLLED HEM

Excellent for hemming on medium to lightweight single layer fabrics, on scarves, napkins and ruffles. It can also be used to create decorative pin-tucks.

2 THREAD ROLLED HEM

Since there are only 2 threads, the result is lighter & finer than the 3 thread version. This is suitable for fabrics like chiffon and also used for bridal veil edging.

3 THREAD PICOT EDGE

Hem finish with a slightly scalloped appearance, used to hem sheers and lightweight delicate fabrics. Works well on batiste, cotton voile, lawn, chiffon, georgette and fine knits. Excellent for finishing scarves, handkerchiefs & pocket squares!

3 THREAD LETTUCE LEAF EDGE

A popular decorative wavy edging on stretch fabric using the differential feed. Can be used for more dramatic curves with a nylon cord encased. The differential feed controls the speed of fabric which can either be stretched to create more wave or eased to remove puckers.

FLATLOCK 3 & 2 THREAD

3 thread is perfect for joining fleece / knit fabrics. Can also be used as a decorative accent with heavier threads to resemble the top cover stitch seen on sportswear. 2 thread is ideal for joining lace to silk on lingerie. The reverse side looks like a ladder stitch.
